WATER POLLUTION CONTROL

RE: ACUSHNET COMPANY (SCW)

Dear Sir:

With reference to your letter of May 23, 1973, and subsequent communication between your office and this Company, and this Company's consultants, Charles T. Main, Inc., regarding the provisions attached to the approval of recommendations made in the Addendum submitted March 26, 1973, we herewith submit a Waste Water Implementation Schedule Progress Report and a Revised Application for Permit to Discharge.

The Waste Water Implementation Schedule Progress Report reviews the results of sampling programs carried out after discharges at this location were combined, covers the agreement reached between the Acushnet Company and the Town of Acushnet regarding the Town's acceptance of pretreated industrial wastes and sanitary sewerage into their sewerage system when completed, and lists the progress on steps taken by the Acushnet Company to further modify manufacturing procedures and methods.

It is respectfully requested that our Implementation Schedule, as amended, be further amended to incorporate the proposals and dates as set forth in this Progress Report.

It is the intention of the Acushnet Company to file a copy of the Revised Application for Permit to Discharge along with copies of our Preliminary Report on Waste Water Disposal, the Addendum to the Preliminary Report, and the Waste Water Implementation Schedule Progress Report with the Environmental Protection Agency of the United States government.

When you have completed your review of the Progress Report and Revised Application for Permit, we would be happy to meet with you to discuss any questions or items of interest.

January 10, 1974

Thomas C. McMahon, Director
Division of Water Pollution Control
